Introduction

Wohlstand Global LLC with its 25+years of vast experience and expertise in the financial industry, majorly in the FX markets, has come out by launching a new Exchange in the Crypto markets. Starting the base from St.Vincent and Grenadines, we have now made a stronghold by acquiring the license to run the Crypto exchange in the European zone. We operate worldwide with our operational office in Dubai and partner offices globally.

Wohlstand Crypto Exchange (WCEX) is a regulated Crypto Exchange platform that lets you buy and sell your cryptocurrency and tokens with enhanced security. The Exchange runs on a Website and an App that lets you convert fiat currency (ie., USD, USDT..etc) into the Cryptocurrency of your choice (ie., BTC, ETH..etc) and vice versa. The exchange facilitates different payment systems to transfer the payments either to your card account or your Crypto wallet.

Token Tokens are digital currencies that are created on existing blockchains by using smart contract facilities. The most common blockchain token platform known is Ethereum and Binance. Tokens built using the Ethereum platform are known as ERC-20 tokens and tokens built on the Binance platform are known as BEP-20 tokens.

Wohlstand Token (WT) is the Native Currency of our exchange and has the crypto community at its heart and soul. WT presents a sizeable opportunity for Wohlstand Crypto Exchange (WCEX) users and those who wish to use WCEX platforms and services.

Dreams & Goals

Dream

The dream of Wohlstand is to get Cryptocurrency accessible to everyone.

In our journey to achieve this dream, we re-conceptualize how money is being transferred, spent, invested and normalized through blockchain technology by designing efficient, simple and useful financial services that have a lasting positive impact on people's lives.

Goals

- Drive the World to Prosperity through Cryptocurrency
- We believe that by speeding up the transition in adopting Cryptocurrency, we can help people globally to:
 - Enhance proficiency in the usage of their money –the ability to access funds anytime and anywhere
 - Protect their data - cryptography-secured blockchain makes data tampering highly unlikely
 - Shield their identity - no central entity can compromise your identity.

The Four Testaments of Wohlstand CEX

About Us

Wohlstand Global

Wohlstand Global is a privately held company with diversification in brokerage, asset management and technology. Wohlstand now ventures into the Crypto industry with a complete exchange to trade Cryptos and to provide capital support to blockchain projects/teams, joint head investment and community investment.

Wohlstand Markets

WOHLSTAND MARKETS a primary vertical of the group is a Forex and CFD broker regulated under the FSC of Mauritius. As our bread and butter, we have been in trading for more than 25 years, so we understand the true needs in Forex Trading. We have assured the best of technology, liquidation, execution and support at all times in trading.

WOHLSTAND MARKETS a Forex, Bullion and CFD broker, constantly focus on delivering customized products and services regardless of the client being either retail or institutional. With tight spreads, fast executions as well as unmatched support to our clients, we try to be one of the best in the industry and having tie-ups with top highly regulated liquidity providers in the industry. In simple words, our trading products are built BY TRADERS FOR TRADERS.

Wohlstand InfoTech

Wohlstand InfoTech provides professional data research, consulting and technical services in the field of Forex and Crypto Markets. Most of the team members are senior experts and technical talents coming from the top financial securities industry. The technical team members of the platform are early Crypto investors. Started by building automated trading systems for the trading industry now expanding to various fields in technology and development.

It provides efficient and diversified brand promotion and marketing services for the project, backed by high-quality community import services.

Wohlstand CEX

Wohlstand CEX is a world-class reliable trading platform, set up in 2021, with companies around the world and headquartered in European Region. The technical members of the WCEX platform are early crypto traders & investors. The management team comes from top financial securities industry, with rich experience in asset management, security protection and underlying architecture development.

Wohlstand CEX provides global users with one-stop cryptocurrency financial services such as spot trading, margin trading, and asset management.

The WCEX platform adheres to the core values of the product, making it reliable, innovative to the core, integrity as the soul and users as wealth. We are committed to prime the new trend of the Crypto-asset industry by building a platform inclusive of technology & finance.

Overview

Wohlstand CEX powers high-availability, fully resilient and horizontally scalable components.

Exchange

In Wohlstand Cryptocurrency Exchange (WCEX), users can make instant transactions with Cryptocurrencies. Exchange users can buy or sell them for fiat currencies or exchange them for electronic units of another digital asset. The crypto exchange runs 24/7. One of the advantages of such platforms is anonymity. All your transactions are reliably protected through modern technology.

Spot Trading

Wohlstand CEX is supported by an exclusive rapid matching engine the Cryptoexchange will list more quality coins/tokens which continue to perfect user experience and liquidity.

Margin Trading

Wohlstand CEX margin trading platform will provide professional users with high leverage trading and hedging services.

WCEX users can use the margin loan for leverage, to open a position that is greater than the balance of their account.

Platform

Wohlstand CEX Comprises of Platforms that help the users grow towards prosperity.

Launchpad

Wohlstand CEX Launchpad will ease upcoming projects to raise funds in a centralized manner. The native token staked users will get priority based on their staked amount with the exchange.

Staking

Wohlstand CEX platform helps to stake tokens for a selected locking period. Users who stake will be given exclusive benefits for holding and locking tokens in the staking wallet.

Governance

A governance token grants its holders voting rights, which enables them to have their voices heard when changes are made to the development of the Exchange and listing of the new currencies protocol. Investors who own governance tokens will have a privilege on protocol fees, trading costs and other benefits.

NFT Marketplace

Wohlstand marketplace is a platform to trade virtual items and technology for building metaverses. We will bridge the gap between real and virtual worlds by creating a platform that accumulates multiple metaverses for brands, influencers, video games, sports organizations, broadcasters and all kinds of entities.

Payment Methods

Wohlstand CEX will overcome the difficulties when trying to buy & spend with Cryptocurrencies.

Payment through Credit/Debit Card:

The credit/debit card addresses these difficulties by allowing cardholders to:

- A. Use their credit card and debit card to transfer funds and buy Cryptos
- B. Enjoy instant top-up and payment completion within the brief period
- C. Withdraw funds back to their cards which makes transactions faster and at tips

Payment through Crypto:

Wohlstand CEX Pay delivers the following value propositions:

- A. Low fees. Merchants pay minimal fees for settlements in crypto or fiat, saving up to 80% on fees versus typical payment processors
- B. Low volatility & minimal risk offered by letting merchants accept cryptocurrency and get paid in their preferred crypto or fiat currency
- C. Easy to set up, view and manage payments in a matter of minutes

Exchange

Spot Trading

Wohlstand CEX shares top Liquidity Engines to ensure that customers have access to deep liquidity pools and the best execution prices. Community users can trade on the Exchange via the desktop interface and the Exchange App. Wohlstand CEX Exchange supports trading pairs for cryptocurrencies with leading market volume makers such as BTC, ETH, XRP, DOGE and more, as well as the Wohlstandtoken(WT), the native token of Wohlstand CEX Exchange. The fees on the exchange are based on trading volume and WT staking. The higher the volume and/ or the higher the amount of WT staked, the lower the trading fees. Users enjoy discounted trading fee if they pay the fees in WT Token. Please refer to the following table on our detailed fees & limits schedule.

Fee Structure

Spot- Maker/Taker
0.25% / 0.25%

Withdrawal Fees Structure

Token	Minimum withdrawal Limit	Deposit fee	Withdrawal fee
Ripple (XRP)	15.0000 XRP	Free	0.2500 XRP
Binance Coin (BNB)	0.1000 BNB	Free	0.0050 BNB
Ethereum (ETH)	0.0060 ETH	Free	0.0040 ETH
Tron (TRX)	150.0000 TRX	Free	1.0000 TRX
Litecoin (LTC)	0.0200 LTC	Free	0.0050 LTC
Bitcoin (BTC)	0.0010 BTC	Free	0.0005 BTC
Dogecoin (DOGE)	25 DOGE	Free	5 DOGE
Bitcoin Cash (BCH)	0.002 BCH	Free	0.001 BCH
NEO	1 NEO	Free	0.1 NEO
EOS	0.14 EOS	Free	0.07 EOS
ZEC (Zcash)	0.01 ZEC	Free	0.001 ZEC
XLM (Stellar Lumens)	10 XLM	Free	0.02 XLM
DASH (Dash)	0.004 DASH	Free	0.002 DASH
USDT-TRX	20 USDT	Free	1.5 USDT
USDT-ETH	50 USDT	Free	25 USDT

Margin Trading

Margin trading on the Wohlstand Exchange allows you to borrow Cryptocurrencies to trade on the leverage market. Users can use the margin loan as leverage to open a position that is larger than their account balance.

Wohlstand CEX margin trading platform will provide professional users with high leverage trading and hedging services. More innovative and competitive contract products are in the pipeline.

Wohlstand Exchange welcomes you to use the margin trading, the future of money – CRYPTOCURRENCIES. We provide 24/7 customer support as well as ample leverage to enhance your trades to capitalize on the performance without physically buying them. Trade with more confidence and security at Wohlstand.

Launchpad(Coming Soon)

Wohlstand CEX Launchpad is for centralized fundraising. Conventional launchpads rely on first come and first clicks. Wohlstand CEX launchpad is fair for all and rewards profitably all token holders. The Wohlstand CEX launchpad doesn't have high financial barriers to get into the market. It also doesn't have whitelist spots. The Wohlstand CEX launchpad fundraising will follow the trilogy system marked in three rounds. The platform ensures guaranteed fund allocation to the participants based on the quantity of Wohlstand tokens they own.

Look at our trilogy system for token allocation:

Round 1: Staking Wohlstand Token

This round will have token holders fulfilling the base requirements of staking Wohlstand tokens.

Wohlstand Token holders will get contributed based on the staked quantity of WT tokens.

Each Token holder would be given equal opportunity for their tokens staked.

Round 2: Wohlstand Token Holders

This round will have all Wohlstand Token holders who have WT tokens in their wallet irrespective of staking.

Tokens which users need to hold before the launchpad sale.

Preparation period: All users need to hold the WT tokens for a period of 5 days. All users will get confirmed allocation based on their token held.

Round 3: Queue Method

The third round will take place if IEO projects have any unsold tokens in Round 2.

The round is for everyone and no criteria of staked WT token applies here.

- Login using Wohlstand CEX credentials
- Exchange Launchpad Dashboard: Account information, staking information, reward information, airdrop details, upcoming IEO, user participation IEO pool, claim tokens, reports and statistics, queue method, notification, customer support etc.

Note: Exchange Users will receive the message on their dashboard about their participation status.

- Deposit your eligible fund for Queue Method
- Token Allocation, Distribution and Refund
- The allocated tokens will be funded to the user's wallet after completion of the vesting period if any. It is an automatic process and users can see its detail on their launchpad platform dashboard under the claim token session

Governance

The Wohlstand CEX is governed and upgraded by WT token-holders, using three distinct components the WT token, governance module and time lock. Together, these components allow the community to propose, vote and implement changes through the administrative functions of WT. Proposals can change system parameters, support new markets or add entirely new functionality to the Wohlstand CEX.

WT token-holders can delegate their voting rights to themselves or an address of their choice. Addresses delegated at least 1 million WT can create governance proposals. Any address can lock 10K WT to create an Autonomous Proposal, which becomes a governance proposal after being delegated 1 million WT.

When a governance proposal is created, it enters a review period, after which voting weights are recorded and voting begins. Voting lasts for a certain period. If a majority are at least 1 million votes are cast for the proposal, it is queued in the time lock, and can be implemented after the period. In total, any change to the Wohlstand CEX takes at least one week.

Staking

Staking Benefits of Wohlstand CEX Exchange users can enjoy benefits provided by two types of staking services:

1. WT stake-and-earn: Users can stake WT for 100 days (about 3 and a half months) on the Exchange and earn up to 36% interest annually.
2. Wohlstand Idle –staking: Wohlstand CEX Idle Staking offers users a new way to earn rewards of up to 15% in interest annually on cryptocurrencies held in the Exchange.

Rewards are offered on a flexible term - “lock-up” is needed. The Wohlstand Idle-staking largest limit varies depending on the currency and users with more WT staked on the Exchange are eligible for higher limits

1. All participants can see yields according to the shares of locked staking, distributed on a weekly basis in the staking portal.
2. Wohlstand CEX promotional yields are only available for manual withdrawal during promotion. After the promotion, the unwithdrawn promotional yields will be automatically transferred to the Exchange spot account.
3. The locked staking requires a min amount of 1,000 WT per time; each user can lock and stake up to 10 million WT at most.
4. The withdrawn asset will remain frozen and be unlocked in 24 hours. After the promotion event, the unwithdrawn mining yields will be automatically withdrawn and these too will remain frozen and be unlocked in 24 hours.

Borrowing, Lending and NFT Marketplace

In Wohlstand CEX you don't have to sell your crypto to get cash. At WCEX, you can borrow funds against your Crypto trading assets so you can get a loan while continuing to hold.

It's fast, secure and easy to borrow fiat by using your Cryptocurrencies as collateral. You can enjoy the interest of the idle cryptos.

Lending

In Wohlstand CEX you don't have to sell your crypto to get cash. At WCEX, we let you lend the crypto against your fiat currencies or native token so you can lend while continuing to hold, in addition you will earn the interest.

It's fast, secure and easy to lend your cryptos by using your fiat currencies as collateral. You can enjoy the interest of the idle Cryptos.

NFT Marketplace

Wohlstand marketplace is a platform to trade virtual items and technology for building metaverses. We will bridge the gap between real and virtual worlds by creating a platform that accumulates multiple metaverses for brands, influencers, video games, sports organizations, broadcasters and all kinds of entities. Connecting the entertainment industry with the global metaverse.

As Wohlstand CEX Borrowing, Lending, NFT marketplace are in pipeline more details will be updated to our community.

Value Proportions

Lowest Trading Fee To overcome the competition, Wohlstand provides the lowest trading fee to their user.

2FA Security Wohlstand CEX has focused more on the client's accounts and funds security. Every client must enable two-factor authentication to use every feature we have provided in our cryptocurrency exchange.

Instant Deposit and Withdrawal With the most advanced CRM, clients can experience the fastest deposit and withdrawal to their bank accounts.

24/7 Customer Support Wohlstand CEX provides you with the service you need with our knowledgeable and experienced customer support team.

Trade Crypto in Minutes Wohlstand Crypto Exchange is available on both mobile and website 24/7.

Sign up Create your crypto account with the fastest and easiest KYC verification process.

Fund Connect your card for the fund deposit process and the amount will be deposited into your wallet in a short span of time.

Trade Once your funds are ready, click the Trade button and pave your way for a prosperous future.

Wohlstand Token

In general, the native currency is a currency in which you will receive payment from your payment processor.

Issued in January 2022, Wohlstand Token (WT) is a multichain, governance native currency with value-added privileges based on the Wohlstand business ecosystem. WT is issued on Ethereum ERC20 protocol and Binance chain BEP20.

Native token users earn rewards if they stake their tokens. The more they stake, the more the reward they will have from the exchange.

Staking platform to stake tokens for the selected locking period. Users will be offered exclusive benefits for holding and locking tokens in the staking contract. The total rewards offered by the platform is based on the number of locked tokens and the period for the token unlock.

Governance

A governance token grants its holders voting rights, which enables them to have their voices heard when changes are made to smart contracts and issuing protocols. Investors that own governance tokens, on top of protocol fees, trading costs and other benefits.

Tokens created by developers that give token holders a way to influence the development of a protocol are referred to as governance tokens. Holders of governance tokens (known as “stakeholders”) have a wide range of options to influence project choices such as giving or deciding on new feature ideas and they even have the power to change the governance structure.

Overview

The Wohlstand Token (WT) is a multichain, governance native currency and value-added privileges protocol is designed to run in continuous cycles, during which it burns from its initial circulating supply at the end of every quarter until it reaches its programmed minimum of 20 percent of the total supply. At the same time, it builds up a backing Exchange reserve holding \$USD, which acts as a price anchor and makes itself available as a sophisticated reward system for holders of the native currency of Wohlstand CEX Exchange \$WT token.

Multi-chain Token

Wohlstand Token (WT) supports a multichain ecosystem mainly BSC and Ether chain, the tokens are available in BSC scan and Etherscan explorer Wohlstand Token (WT) can be viewed on the explorer using the smart contract address of the token. **Wohlstand Token initially supports BEP 20 and ERC 20 standards which will be expanded to other blockchain such as polygon and harmony.**

BEP 20 Standard

BEP-20 is a native token standard on the Binance smart chain that extends ERC-20, the most common Ethereum token standard. It has a public ledger that has all the transactions done by the users on the network and how they can be spent, who can spend them and other rules for their usage. Since its similarity to Binance Chain's BEP-20 and Ethereum's ERC-20, it's compatible with both.

BEP-20 was termed as a technical specification for Binance Smart Chain, with the goal of supplying a format for developers to launch a range of different tokens. These could be anything from shares in a business to dollars stored in a bank vault. Of course, one could equally create a native asset as a BEP-20 token or even peg tokens from other blockchains to make them usable on Binance smart chain.

This is what's done with "Peggy" coins, which are essentially BEP-20 versions of other Crypto-assets (such as LINK or XRP).

BEP-20 token transfers are fueled with BNB. An incentive for validators to include the transactions in the blockchain, will be distributed in BNB as a fee for their troubles. Binance Smart Chain was envisioned as something of an extension to the Binance chain. With dual chain architecture, both chains are complementary. Binance smart chain caters to decentralized applications without congesting the original chain, which is perfected for ultra-fast trading.

ERC 20 Standard

The ERC-20 introduced a standard for fungible tokens, in other words, they have a property that makes each token be exactly the same (in type and value) as another token. For example, an ERC-20 token acts just like the ETH, meaning that 1 token is and will always be equal to all the other tokens.

The ERC-20 (Ethereum Request for Comments 20), is the token standard for Ethereum that implements an API for tokens within smart contracts developed.

It provides functionalities like transferring tokens from one account to another, getting the current token balance of an account and the total supply of the token available on the network. Besides these it also has some other functionalities like approving the amount of token from account that can be spent by a third-party account.

Smart contract which implements methods and events, it can be called an ERC-20 Token contract and once deployed, it will be responsible to keep track of the created tokens on the Ethereum ERC 20 Standard.

Explorer

A Public Ledger that exposes details about tokens and operations in the environment in a simple and intuitive dashboard.

To visualize smart contracts, balances, token owners, minters, transfer activities and more. The token explorer takes advantage of the organizational information and decorates the account addresses with human-readable information.

A blockchain explorer is a software that uses API and blockchain node to draw various data from a blockchain and then uses a database to arrange the searched data and present the data to the user in a searchable format.

User inputs are searchable terms on the explorer which are then searched through an organized table on the database. The explorer will already have organized data from a blockchain into the table format.

For most, a blockchain explorer will allow you to search and explore data about recently mined blocks or recently carried out transactions on a blockchain. Ideally, they allow you to view a live feed of blocks as they are mined, as well as the data related to the blocks.

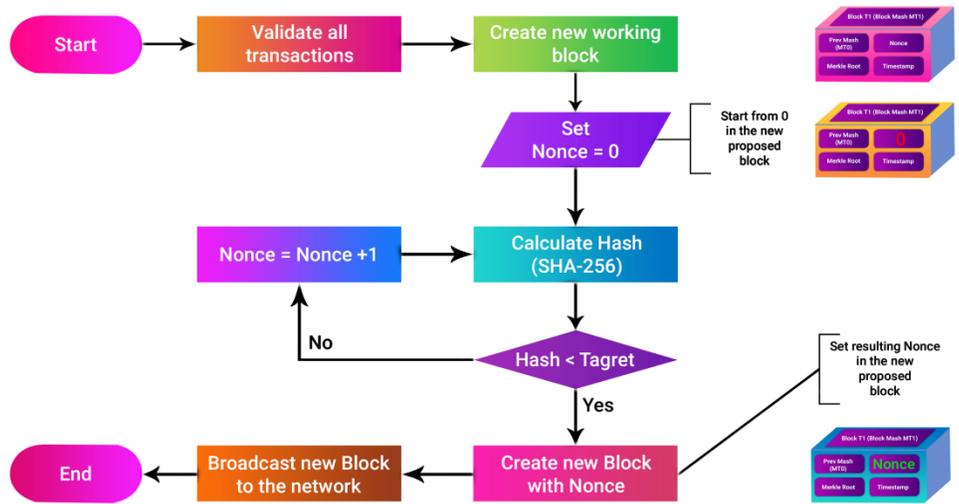

Blockchain explorers are the search engine of cryptocurrencies and blockchain. They allow users to access different detail related to transactions on specific wallet addresses and blockchains including the amount transacted, sources and destination of funds, and status of the transactions.

Explorer can be used to extract any data related to transactions, wallets and blockchains including rich lists and hidden messages.

Proof of Work (POW)

POW is a mechanism that allows the decentralized network to come to a consensus, or agree on things like account balances and the order of transactions. This prevents users from "double spending" their coins and ensures that the Ethereum chain is incredibly difficult to attack or overwrite. The proof-of-work protocol requires miners to go through an intense race of trial and error to find the nonce for a block. Only blocks with a valid nonce can be added to the chain. Proof of work handles issuing new currency into the system and incentives for miners to do the work. Because miners work in a decentralized way, two valid blocks can be mined at the same time. This creates a temporary fork. Eventually, one chain will become the accepted chain once the next block has been mined and added, making it longer.

Proof of Stake

To be eligible to take part, users must deposit and risk many cryptocurrencies, this is known as a “stake”. People who supply stakes are randomly selected to record and verify information on the blockchain. Forgers taking part in a proof of stake cannot spend or move their stake. If they are caught recording false information or doing something against the rules, they risk giving up their entire stake.

In most proof of stake systems, the larger your stake the greater your chances of being selected to record and verify the blockchain. Forgers are willing to endure the cost and risks of staking for the chance to earn transaction fees paid by users of the system.

The probability of validating a new block is determined by how large of a stake a person hold.

The validators do not receive a block reward, instead they collect network fees as their reward.

Proof of stake systems can be much more cost and energy efficient than proof of work, but are less proven.

Proof of Burn

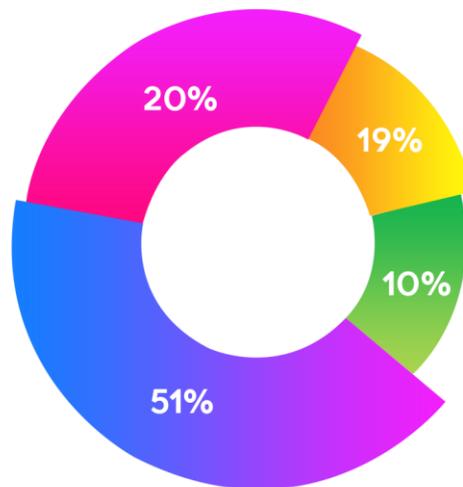

- Coin burning is the process by which digital currency miners and developers can remove tokens or coins from circulation, thereby slowing down inflation rates or reducing the total circulating supply of coins
- Reducing the number of tokens in supply, developers and miners hope to make the token that still is in circulation rarer and thus more valuable.
- Proof of Burn (POB) is one of the several consensus mechanism algorithms implemented by a blockchain network to ensure that all
- Participating nodes come to agreement about the true and valid state of the blockchain network.
- These tokens are then transferred into a frozen private address called a Burn address. It's a one-way address with no ability to reverse the transaction or withdraw the coins - the burn address to which the tokens are sent can never be recovered because there is no private key corresponding to that address.

Tokonomics

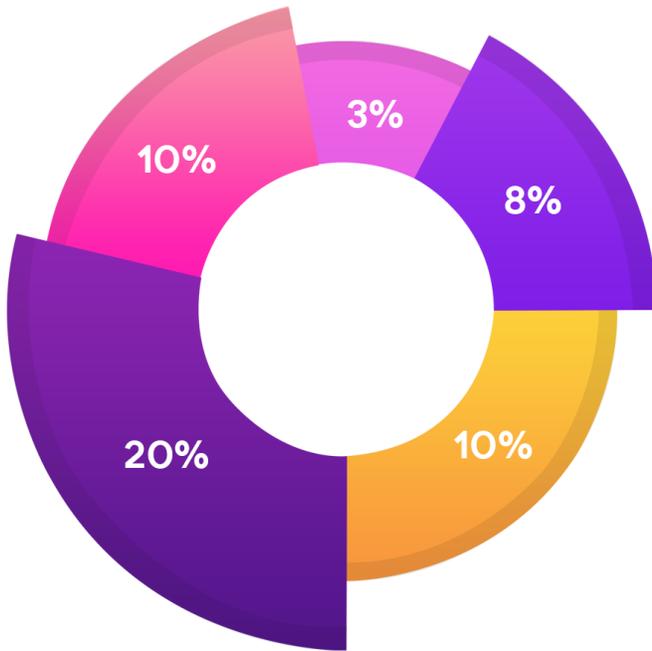

The total Wohlstand token issuance is one billion and the public offerings are carried out in multiple phases. At the end of any stage, there are some Wohlstand tokens left, they will be distributed to the top participants in Wohlstand CEX to help the exchange economy.

- Token name: Wohlstand Token
- Token Symbol: WT
- Token standard: BEP-20, ERC-20
- Blockchain platform: Binance Smart Chain, Ethereum Mainnet
- The smart contract addresses for BEP-20 tokens is: 0x065b77156B9aB417Bd30Fc25e30Ce5B9A7dD2066
- The smart contract addresses for ERC-20 tokens is: 0x065b77156B9aB417Bd30Fc25e30Ce5B9A7dD2066

Foundation Reserve-10%

The Smart Contract address to lock Foundation Reserve ERC-20 tokens is:

0x9Ab576b0e754574B77445239605B636f8719281B

The tokens are locked for one year and released in:

0x1c4d81e39125F4084C8c859e693b9B263d0B392E.

The tokens will be released to the wallet from the governance protocol which has been conducted.

Reserve Fund-10%

The Smart Contract address to lock Reserve Fund ERC-20 tokens is:

0xf3a7Fa0c1595EA9bbBB6f9757B96Bf3cF156eFAA

The tokens are locked for one year and released in:

0xb066f3b90494F49Aa201f700DB7fF2FC26451429

These funds will be used as 10% of the supply is set aside by Company to meet any future costs arising unexpectedly and development of the community, locking the remaining.

Team-09%

The Smart Contract address to lock Team Reserve ERC-20 tokens is:

0x4CC8ad9daD9f13cF9b5962bff464f8A0d12b636a

The tokens are locked for one year and released in:

0xF481324950486bd082776Ac27EDF076A74De6188

The Team tokens will be released to the wallet from the user approval by the governance protocol conducted.

Community Growth - 10%

The Smart Contract to lock Community Growth ERC-20 tokens is:

0x61f3abb75a4f5ac385b07b8aebd43d23413f5f6f

The tokens are locked for one year and released in:

0x8d9c2967Bbade7fC651325D318434626f322D9e5

These funds will be used for the growth of the community of the Wohlstand Crypto Exchange.

Our goal is to build a strong foundation of the project with the strong support from our community.

Governance-03%

The Smart Contract to lock Governance protocol BEP-20 tokens is:

0xf3a7Fa0c1595EA9bbBB6f9757B96Bf3cF156eFAA

The tokens are locked for 3 months and released in:

0xA1743BAc26De3a663A4E6c5A5502DfbF35d79E2F

The Governance Protocol tokens will be utilized for the rewards for the users participating in the Governance protocol.

Burning - 10%

The Smart Contract to lock Burning wallet BEP-20 tokens is:

0x9ab576b0e754574b77445239605b636f8719281b

The tokens are locked for 3 months and released in:

0xa9E12f05d621A936A1080157A58b1e0B69f7C2bE

Wohlstand CEX will continue to use 25% of its fee income for WT token repurchase and burning until WT is reduced to 200 million supply.

IEO - 05%

These Tokens are utilized for releasing the tokens on IEO for list on tier-1 exchange

The wallet address containing IEO tokens is:

0x94740d4E027B056027Ca5975F765BF305A8Fd985

These tokens will be released only during the Initial Exchange offering (IEO) and remaining tokens will be burned at once.

Public Sale address - 15%

These Tokens are utilized for releasing the tokens to the Public during the public sale phase

The public Sale Reserve address is:

0xFD07Fed68cE97b1C1B07F3Da93C032E9c331B0b5

The tokens will be released according to our vesting schedule which is declared by the team.

Marketing Reserve address - 08%

These Tokens are utilized for the purpose of marketing our exchange and native token Wohlstand Token (WT)

The Marketing Reserve address is:

0x6067C9e87e5362bB501F3020431c074eF76F951f

These tokens will only be released by the team as mentioned in the vesting schedule.

Staking Reserve address - 20%

These Tokens are utilized for providing the staking rewards to the Wohlstand Token Holders

The Staking & Burning Reserve Wallet address is:

0x40284739FB0237e35C7FC961c04aF50335BB23C5

None of the tokens from the Staking Reserve Wallet will ever be sold on any exchanges.

Wohlstand Token Values

Discount on trading fees

WT can be deducted directly as trading fees (50% less) with the same market value at the dedicated discounts.

VIP services and Benefits

Wohlstand CEX Users with a certain amount of WT holding can obtain VIP membership and enjoy privileges such as fee discounts, withdrawal acceleration, and exclusive customer service.

Exclusive promotional Benefits

WT holders are entitled to special qualifications for promotional campaigns on Wohlstand CEX such as airdrop incentives. Aside from circulating within the Wohlstand CEX ecosystem, Wohlstand CEX plans to extend usage and application to scenarios such as launchpad, Staking and Governance.

WT Repurchase & Burning History

Wohlstand CEX will burn WT Tokens every quarter from its trading and service (50% of its transaction fee income)

Burn process will continue until the total supply of WT reduces to 900 million.

This will decrease the total supply of tokens hence providing stable growth to the WT holders.

Wohlstand CEX made a decision that is, when the “900 million” target is achieved, Wohlstand CEX will continue to use 25% of its fee income for WT token repurchase and burning until WT is reduced to 200 million Supply.

A dashboard will be available to track the WT Burning History to the community.

Additional Privilege for Forex Traders

WT Holders have the privilege to get more 20% value when users deposit the WT tokens as a payment in the top forex brokerages to start up with our own brokerage

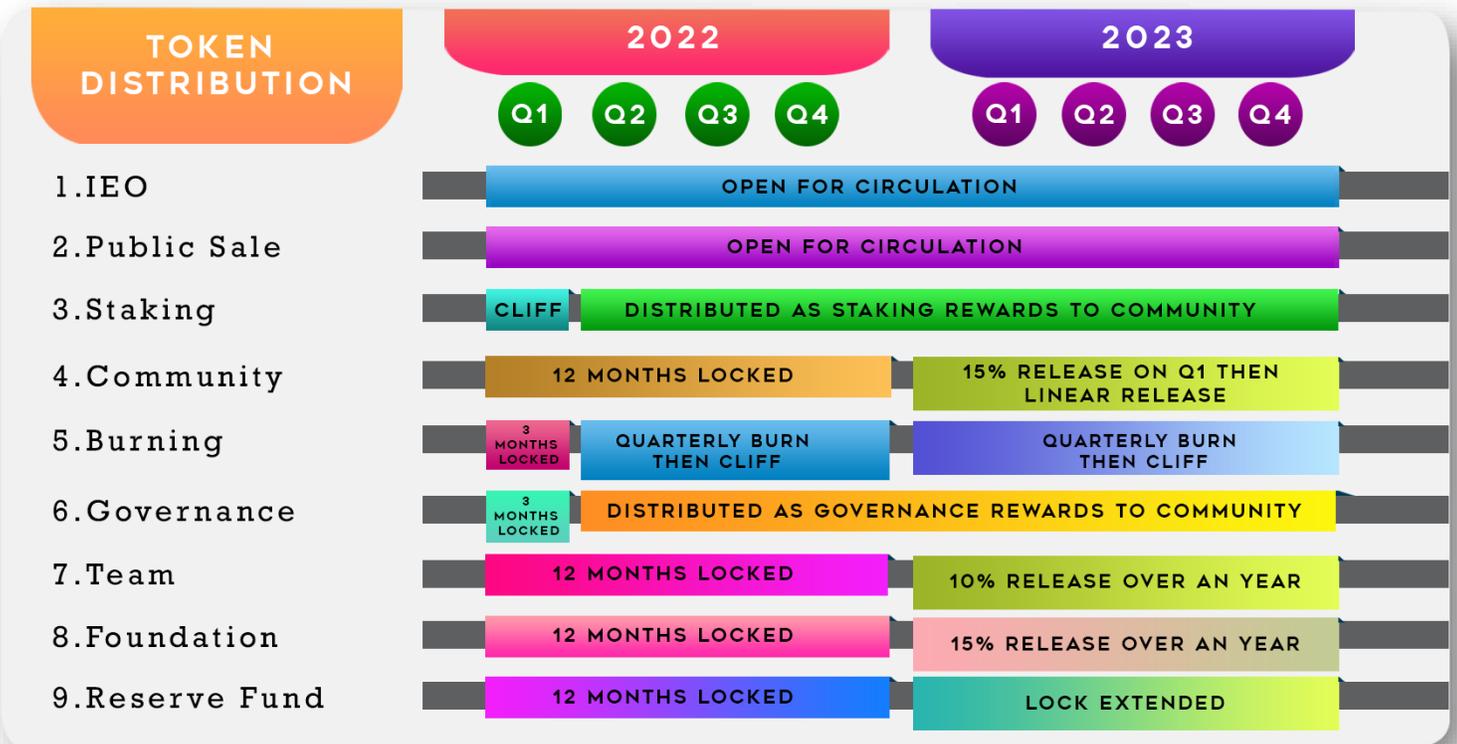

For Example:

If the user Deposits 1000\$ worth of WT tokens on the forex brokerages,

Users will get an additional 20% of value, in this case, 1200\$ will be credited to their account.
