MAKING MOONLAND A REALITY

THE SPARK IN 2021

- ✦ In 2021, Miguel Palencia envisioned a new possibility within the gaming universe. His pioneering spirit and belief in blockchain's potential birthed Moonland, which, in turn, is being developed by Meta Studios, a design and game studio in UAE.
- ✦ The Meta Studios team, swiftly transformed the concept into a tangible reality, crafting an internal demo within a year. This milestone was not just a proof of concept but a bold declaration of Moonland's revolutionary potential.
- ✦ 2024 unfolds, Moonland stands at the threshold of its public debut. Transitioning from a near-production marvel to a launch-ready phenomenon, we're poised to unveil a gaming experience that transcends the ordinary in Q4 2024.

NFT's

from other brands and games

- ◆ Moonland isn't just a game; it's a universe where relationships flourish, and every connection unlocks new possibilities.
- ◆ Use your NFT from other game to hang around Moonland and meet with other friends from that same other game! Perhaps, go hang out with them at a party in the Moonland apartments that only allows people from the other game!
- ◆ But the innovation doesn't stop there. Moonland is forging paths with fashion brands, bringing real-world style into the digital domain. Picture this: purchasing a designer purse or coveted sneakers, each accompanied by a QR code that, when scanned, reveals your item within Moonland. It's not just about looking good; it's about bridging worlds, where your style transcends physical boundaries, enhancing your digital identity.
